BRIEF SUMMARY

As an enthusiastic fresher MERN Stack developer proficient in JavaScript MongoDB, React, Node.js, and Express.js, I am dedicated to building scalable, high-performance web applications. Skilled in creating dynamic, responsive, and interactive solutions, I excel in delivering seamless user experiences and am eager to contribute and grow in the software development field.

EDUCATION

SRM Institue of Science and Technology,Ramapuram   *Sep 2021-June 2025*
B.Tech. Information Technology– Cgpa: 8.5 / 10

Holy Cross Matriculation Academy   *2021*
12th – Matric – Percentage: 92 / 100

Holy Cross Matriculation Academy   *2019*
10th – Matric – Percentage: 91 / 100

SKILLS SUMMARY

Programming:	HTML, CSS, JavaScript
Software & Tools:	**Backend–** Express.js, Node.js, MongoDB, MYSQL **FrontEnd–** HTML, React, TailWind CSS
Others:	Git, UI/UX, PowerBI, AWS, Devops, JSON
Soft Skills:	Networking, Adaptibility, Time Management, Creativity

PROJECTS

TripAdvisor Clone
(HTML,CSS)
I recreated the user interface of TripAdvisor Clone, using HTML and CSS.
This project involved meticulous attention to detail in replicating the layout, design elements, and responsive behavior of Udemy's web pages.
By implementing modern web design principles and techniques, such as flexbox and media queries, I ensured the project was both visually appealing and functional across different devices.
I sharpened my skills in semantic HTML and CSS styling, and gained practical insights into creating user-friendly web interfaces

Greenden
(TailwindCSS, Javascript)
Created and developed Greenden, an e-commerce website dedicated to plant enthusiasts, using Tailwind CSS for responsive design.
Implemented responsive web design principles to ensure optimal viewing experience across various devices.
Demonstrated proficiency in front-end development, including HTML, CSS, and JavaScript, to deliver a visually appealing and functional website that enhances user engagement and satisfaction.

Bulk Mail Application
(Nodemailer,React,Node.js,Mongo DB,Express)
Built a robust bulk mail application using Node.js and Express.js for the backend, enabling efficient sending and management of large-scale email campaigns.
Integrated Nodemailer for Email Delivery: Utilized Nodemailer to handle the email sending process, ensuring reliable

and customizable email dispatch through various SMTP services.

Frontend Implementation with React: Designed an intuitive and responsive user interface with React, providing a seamless experience for composing, scheduling, and managing email campaigns.

Data Management with MongoDB: Employed MongoDB for storing and managing user data, email templates, and campaign details, enabling efficient retrieval and updates within the application

Weather application

(Axios API,React)

Developed a weather application using React for the front-end and Axios for API calls.

The app fetches and displays real-time weather data from a weather API, including temperature, humidity, and weather conditions.

Users can search for weather information by city and view forecasts.

The responsive design ensures a seamless experience across various devices.

WORK EXPERIENCE

Codsoft

(Web Develpment)

Engaged in a one-month virtual internship at codsoft, focusing on practical applications of web development techniques using Java. Applied theoretical knowledge to real-world datasets, contributing to solutions that enhance predictive accuracy and data-driven decision-making.
